

# Why Choose Sage Simply Accounting?

- **Manage your small business financials in the language of your choice.** Enjoy fully bilingual accounting software that easily switches between English and Spanish.
- **For 25 years, Sage Simply Accounting has been the trusted choice for over 500,000 small businesses and accountants in Canada.** Now available in the US specially customized for US small businesses and backed by bilingual English/Spanish customer sales, service and technical support staff.
- **Easily manage your cash flow, bill payments, and create invoices.** Take control of your small business financials while easily reigning in your costs.
- **Ensure your accounting practices are in compliance.** A true full-time audit trail tracks every entry and adjustment to comply with Generally Accepted Accounting Principles (GAAP).
- **Avoid costly outsourcing fees with in-house payroll.** Receive the latest federal and state payroll tax updates and automatically calculate employee earnings and deductions for easy, hassle-free paydays.
- **Gain a better understanding of your customers.** Take advantage of robust analysis, reporting and forecasting options that provide a complete view of your financials and business health.
- **Take your business global with multi-currency accounting options.** Increase your flexibility by managing financial transaction in two or more currencies.
- **Improve customer service and reduce waste with advanced inventory management.** Easily track items with serialized inventory and manage inventory levels, costs, and margins.
- **Better manage your time and money.** Track all revenues and expenses for separate projects, for one or more customers, and keep an eye on profitability.
- **Access a diverse line of accounting software options as your business changes and grows.**
